

## SALMON FISHING IN NAMSEN AND ROEBUCK HUNTING

Roebuck trophy hunting in Vikna combined with salmon fishing in Namsen is a great experience providing you with life-long memories in a fresh and pure nature. Namdalen is the lung of Europe.

The river Namsen is one of the best sport fishing rivers in the world and contains unique salmon of considerable size eligible for fishing. Namsen has a position among the top 5 salmon rivers in the world when it comes to the amount of salmon in the river and the total weight of the salmon being caught. Every year we catch salmon larger than 10, 15, and 20 kilos. Every day we observe and catch salmon. Shortly after being caught, the salmon is unhooked and carefully returned to the water.

In Vikna, Jøa, or Leka there is a large roe deer population spread among lakes, ponds, bays, valleys, and mountains with sparse vegetation. In this area, spotting the roebuck at long distance is easy. The roebucks are big (20-25 kilos), many of them have golden antlers, and the hunter's trophies are often between 300 and 500 grams.

This package includes the following: All transport/rental car, full board accommodation in single rooms, practical shooting training with weapons and Norwegian hunting proficiency for big game hunters certificate, borrowing of weapons and ammunition, one roebuck per hunter, hunting and fishing guides, one event in Vikna and one event in Grong.

Number of guests per group: 4-8 persons.

Time and length of stay: Seven days in the period ranging from August 9th to September 15th.
