

SALMON FISHING IN NAMSEN AND GOOSE AND MALLARD HUNTING IN VIKNA

For many years, Stein Karlsen has developed a unique product involving goose and mallard hunting on his farm on Løvøya in Vikna. The area is a natural environment for many birds, and in addition, we breed mallard ducklings every spring. The number of ducklings depends on the number of customers having booked a hunt here during the winter. During a two-day hunt, we should fire at least 50 shots on birds per hunter.

Salmon fishing in the famous river Namsen is always exiting and has attracted sport fishers from all over the world for nearly 200 years. Our unique and healthy salmon population is well known for both its size and volume. In the river Namsen, exiting experiences and encounters with salmon awaits you. We practice "catch and release", and the salmon is therefore unhooked and returned to the water shortly after being captured.

This package includes the following: All transport/rental car, guiding, full board accommodation in single rooms, borrowing of weapons and ammunition, and hunting and fishing licences. One event in Vikna and one event in Grong is also included. Rotation between hunting and fishing activities.

Number of guests per group: 4-8 persons.

Time and length of stay: 6 days in the period ranging from August 1st to September 15th.

PROGRAM
